

# Creating Sustainable 1:1 and BYOD Device Programs

Over 20 Years Supporting Successful Student Device Programs

We understand what it takes to develop and maintain a successful laptop program. With over 20 years of experience in the field, we can help your students to utilise technology to access, create and share their learning. Our experience will guide and support you through every phase of your technology program.

Which device is right for your school? Over the years we have tracked the progress of tens of thousands of laptop devices in school settings. You can benefit from this experience to help you select the right device for your school. We have access to all leading brands at exclusive education prices.

## Building Sustainable Technology Programs

Professional Development	Strategic Planning
--------------------------	--------------------

We make the task of buying devices simple and smooth. Our customised online BYOD portals assist parents to access the right device at the right price with delivery to the door.

Digital Content Management
----------------------------

From deployment, SOE development and repairs, our break fix team will keep your student devices up and running. We have customised SLAs to meet your expectations and ensure maximum uptime.

Instructional Practices	Deployment Planning
-------------------------	---------------------

Measuring Success
-------------------

Our laptop programs include the right warranty, insurance, support and finance options to ensure the sustainability of your school technology program.

IT Infrastructure Considerations	Community Engagement
----------------------------------	----------------------

Mission & Vision
